GENERAL TESTING

Success Criteria / Expected Outcome	Test Method	Result	Comment	Solution
All links navigate to their respective href tag	Manually clicked links Dead link checker used	PASS	Dead link checker displays the following errors – these are perfectly acceptable as the user is not authenticated to visit them	

500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/7/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/7/
500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/6/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/6/
500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/5/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/5/
500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/2/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/2/
500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/1/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/1/
500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/4/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/4/
500 Internal Server Error	https://kcc-app-shop.herokuapp.com/bag/add/3/	form/action(post)	https://kcc-app-shop.herokuapp.com/products/3/

FORM TESTING

Success Criteria / Expected Outcome	Test Method	Result	Comment	Solution
Contact Form Tests	-	-	-	-
Form validation	Enter incorrect / Empty fields and click submit	PASS		
Quantity Stepper Tests	-	-	-	-
Product quantity increases / decreases. Quantity stepper is on both bag and product details pages	Increase and decrease quantities	PASS		
Billing Details Tests	-	-	-	-
Form validation	Enter Incorrect / Empty fields and click submit / pay	PASS		

All form validation other than those listed above are handled by crispy forms and the allauth library.
These were tested manually and operate as expected, however, they are both proven libraries so this testing was not documented.

CRUD TESTS				
Success Criteria / Expected Outcome	Test Method	Result	Comment	Solution
ADD PRODUCT	-	-	-	-
Product displays in products section & added to database	• Login as super user. • Navigate to /products/add/ url • Add a product by filling out the form • Navigate to products url to confirm • Check DB to confirm	PASS		
DELETE PRODUCT	-	-	-	-
Product is deleted from products page & DB	• Login as super user. • Navigate to /products/ url • Click the delete button on the product card • Navigate to products url to confirm • Check DB to confirm	PASS		
EDIT PRODUCT	-	-	-	-
Product is updated on products page & DB	• Login as super user. • Navigate to /products/ url • Click the edit button on the product card • Edit the product details and press save • Navigate to products url to confirm • Check DB to confirm	PASS		
All accounts related CRUD operations are handled by the allauth library. I tested all functionality to ensure it operates as expected. The allauth library is proven so this testing was not documented.
